

College Placement Portal (Python + HTML) Project

Project Details

Project Title : College Placement Portal Application

Problem Statement : To build a Placement Portal Application web application that allows Admin (Institute), Company, and students to interact with the system based on their roles.

Approach : I Used Flask for backend, Sqlite3 for Db and Bootstrap for frontend styling. It allows companies to post job drives, where students can apply and check status, and admin can manage and supervise everything.

Technologies and Frameworks Used

Technology/Library	Purpose
Flask	Python Backend Lib
SQLAlchemy	Connection between Python and SQLite DB
Jinja	Template Engine for Dynamic HTML Pages
Bootstrap	Frontend Styling and Responsive Design
Chart.js	Graphs
Flask-Login	User Authentication and Session Management
SQLite	DataBase
Werkzeug.security	Converting Password to Hash

Database Schema / ER Diagram

Tables :

Users - Stores User Id, Password and Role (Admin, Student or Company).

Company - Stores Data related to a Company.

Drive - Stores Drives Data posted by Companies.

Application - Store Applications data.

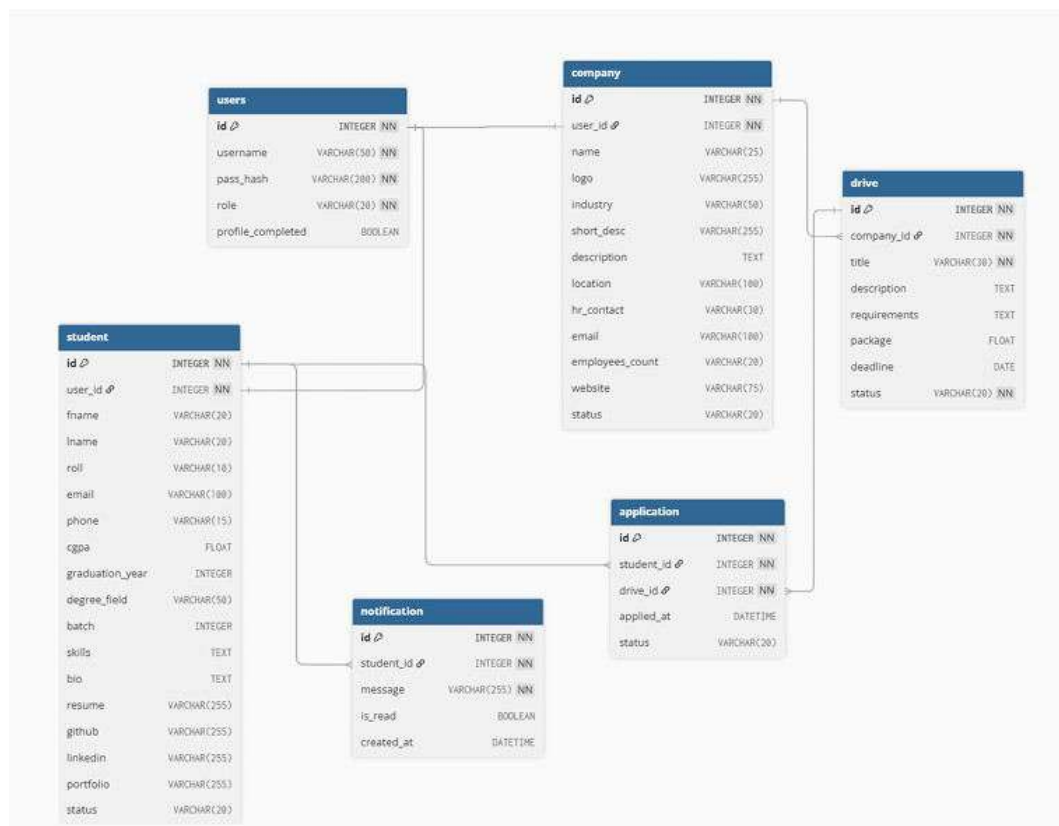

Student - Store Data related to Students.

Notification - Store Notifications for all Students.

Relationships :

One-to-One : Users→ Students, Users→ Company. -

One-to-Many : Company→ Drive, Drive→ Applications, Student→ Applications, Student→ Notifications

File Structure

Project Folder

```
| - app.py           : Main Python File
|
| - main
|   | - decorators
|   | - models
|   | - routes
|   | - templates
|   |   | - admin           : Admin HTML Files
|   |   | - company        : Company HTML Files
|   |   | - student        : Student HTML Files
```

```

|
|- static
    |
    |   |- js
    |   |- css
    |   |- images
    |   |- uploads           : Users Uploaded Files

```

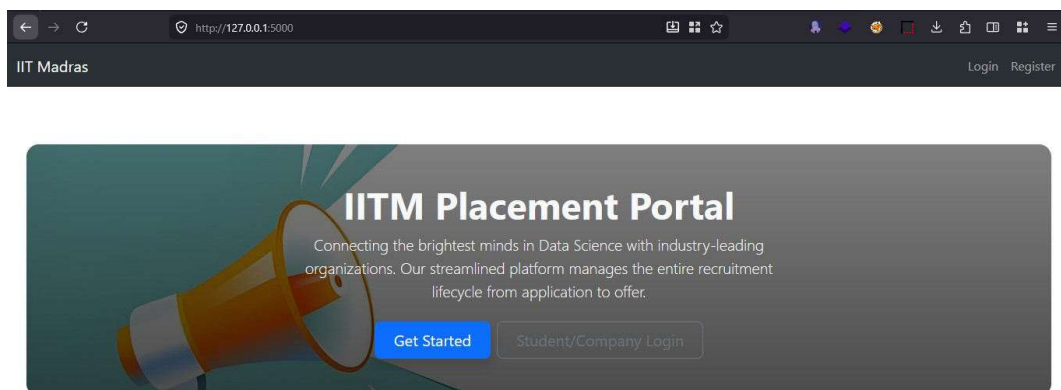

Features

- Login and Registration for Company and Students
- Onboarding Page (Profile Completion Page) Student or Company will not able to view other pages until Submission of Onboarding Form)
- Company, Student and Admin Dashboard with Stat Cards and Chart.js for Graphs.
- Responsive UI Using Bootstrap
- Admin can Supervise everything.
- Companies can post Drives.
- Students can apply and check Application Status.
- Students can upload Resume and Companies can upload Logo.
- Secure Password Hashing and Session Management.

Additional Features: -

- Recommended Job Drives on Student Dashboard Based on Comma Separated Skills.
- Super Search for Admin on Nav Bar.
